ÎNVĂȚAREA ONLINE: VIITORUL EDUCAȚIEI

Keywords: *Online learning, Covid-19, e-learning, IT skills, online applications.*

Cuvinte cheie: *Învățare online, Covid-19, e-learning, competențe IT, aplicații online.*

Online learning or learning via electronic media and the internet is a quickly developing industry all around the globe. These days, e-learning has been demonstrated to be significant to the individuals who comprehend its value. It gives the chance to accomplish extraordinary outcomes at lower costs and at famous foundations, that in any case would almost certainly be incomprehensible. Apart from generally being resourceful, these online courses are accessible at any place and anytime. Accordingly, e-learning is reforming the ordinary instruction framework.

With the spread of Covid 19 in March 2020, we witnessed a major shift and a drastic change in every domain of life. One of the immediate decisions that were taken as the pandemic began was the closing down of educational institutions which remained a major topic of global debate as educational institutes were closed and reopened multiple times until September 2021. As the education system was one of the prime targets of Covid 19, swift actions were taken in this sphere to cater to the loss as a result of those immediate decisions and timely actions we saw a switch from physical to online mode of learning in no time. Online applications such as Zoom, Microsoft Teams and Google Meet have become a significant part of our life when they did not even exist pre-Covid 19.

It is safe to say the pandemic has reshaped our entire sense of reality. Online courses allow you to learn a specific skill set while nurturing your IT skills as well. In today's digital world, technological skills have become mandatory in almost every institution, specifically in educational institutes. Even though online learning still remains a matter of debate in terms of its advantages and drawbacks, and its long-term validity, the fact that online learning has become an integral part of our everyday life remains irrefutable. The probability of the online mode of education staying post-Covid 19 is pretty high, also cemented by the fact that it has turned into an industry worth several hundred billion. The technological market has found a sound investment in e-learning and day by day, new and improved interfaces are made accessible to people all around the world for a better experience during the process of online learning.
